

<b>Course Summary:</b>	This course will focus on actual risk of violent clients, correlate individual and situational violent behavior, legal issues, intra-psychic factors during psychotherapy and the duty to protect. The intent of this course is to teach a standard of care for the prediction of the violent behavior of clients and to reduce the potential of legal risks. Topics covered include risk of violence, protection, victimology, privileged communications, transference and psychopathic implications, neuropsychological factors, mental status, duty to warn, evolving case law, discharge of duty, and the treatment plan.
------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Performance Objectives:</b>
A) List four factors relating to risk from violence. B) Identify four factors relating to protection from violence. C) Identify two elements in the law regarding duty to warn. D) List two factors regarding a treatment plan for violent offenders.
